EXPERIENCE

ZipRecruiter

Senior Software Engineer | Apr 2023 – Apr 2026

- Rebuilt registration and authentication across 30+ entry points for 25M+ monthly job seekers, increasing login conversion by double digits and adding 10K+ weekly SMS opt-ins.
- Designed shared React/Next.js and Go/gRPC authentication services for OTP and automatic login; led adoption across five product groups and retired three legacy services.
- Built AI workflows to plan, implement, test, and review full-stack changes using live Jira, Slack, Notion, and GitHub context via MCP; wrote AI usage guidelines and led the company's first Cursor workshop.
- Shipped embedding-based recommendations for Suggested Jobs and More Candidates Like This, combining vector similarity search, hybrid retrieval, graph traversal, and filtering.
- Reduced homepage load time by 40% through frontend and backend improvements using Next.js and Go.
- Designed typed APIs with gRPC, Connect, and Protobuf; delivered company-wide talks on API design and cybersecurity.

Eightfold

Software Engineer Intern | Jun 2022 – Oct 2022

- Implemented atomic ETL loads, reducing data inconsistency below 2%; expanded consistency monitoring across 56 tables spanning RDS, Redshift, and Firehose pipelines.
- Built a React/Flask console over EMR and S3 that reduced Spark debugging time by approximately 40%; added tests, structured logging, event tracking, and alerts.

SELECTED PROJECTS

Ground Truth / Independent project · Solidity

Built a prediction-market prototype for weather and natural hazards: product and wallet flows, public-data evidence, Solidity contracts, and tests. Local only; no live funds or external audit.

Autonomous Vehicle / UC San Diego · Perception & control

Built perception and control for a 1:8-scale car using Jetson Nano, ROS2, YOLOv5, and OpenCV; achieved 95%+ perception accuracy and 90%+ autonomous track completion.

EDUCATION

University of California, San Diego

Dual B.S., Mathematics–Computer Science and Mechanical Engineering | 2019 – 2023

Cum Laude · GPA 3.9/4.0

TECHNICAL SKILLS

Languages: Go, TypeScript/JavaScript, Python, SQL, C/C++, Rust, Swift

AI & data: LLM agents, MCP, RAG, evaluation, vector search, retrieval/reranking, Spark

Product & systems: React, Next.js, SwiftUI, REST, gRPC, Protobuf, authentication, distributed systems

Infrastructure: AWS, PostgreSQL, Redis, Kafka, Docker, Kubernetes, Terraform, OpenTelemetry
