

先用两个身份，试一次。

Try the project from both sides.

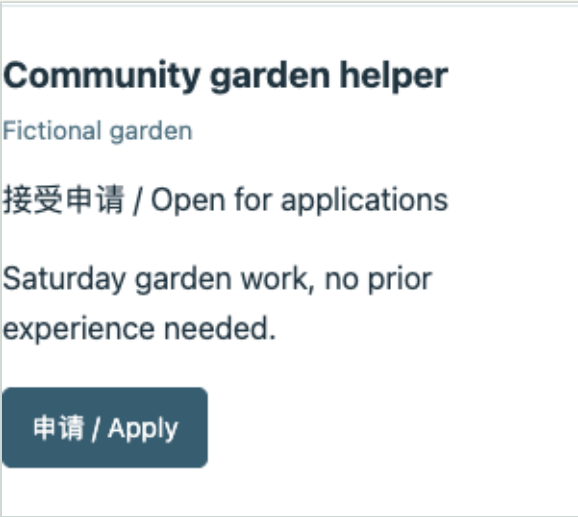

先按入门指南启动 reference，再打开两个独立的浏览器会话：一个用普通窗口，另一个用无痕窗口。
Start the reference using the setup guide. Use a regular browser window for one role and an incognito window for the other.

A · 发布者 / Poster

注册时选择发布者，填好标题、组织和说明，点击发布。
Register as a poster. Enter a title, organization and description, then publish.

B · 申请者 / Applicant

用另一个练习邮箱注册申请者，刷新页面，找到刚发布的机会。
Register as an applicant with a different practice email. Reload to find the opportunity.

B · 申请者看到的机会 / The applicant's view

自己检查 / Check your work

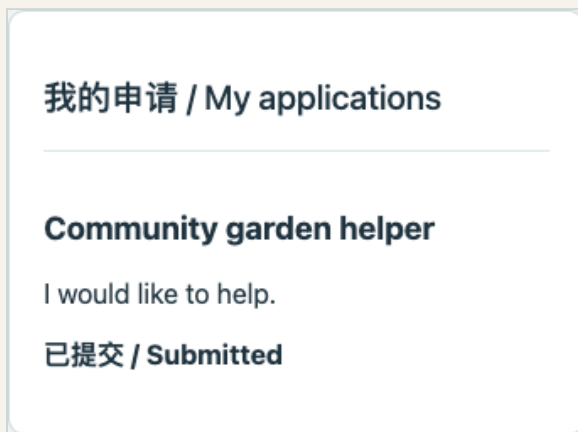

两个窗口应显示不同的登录身份。只是多开一个普通标签页，会共用登录状态。
Check that the windows show different signed-in identities. Two ordinary tabs share the same session.

提交申请，确认它被保存了。

Apply, then check that it was saved.

在申请者窗口点击“申请”，写一句申请说明，再提交。下面“我的申请”应出现这条记录。

In the applicant window, choose Apply, write a short note and submit. A record should appear under My applications.

B · 提交后的记录 / Saved application

自己检查 / Check your work

刷新页面，记录还在，状态仍是“已提交”。看到提示不等于数据已保存；刷新是第一项检查。

Reload. The record should remain with Submitted status. A success message alone does not prove that the data was saved.

如果找不到：先确认登录的是申请者，再看页面提示。把操作、提示和预期结果记到项目记录里。

If it is missing, check the signed-in role and the page message. Record your action, the message and what you expected in your project journal.

想一想 / Think it through

如果同一个人重复申请，系统应该怎么处理？先写下你的规则，再试参考项目。

What should happen if the same person applies again? Write your rule before testing the reference.

换到发布者，处理这条申请。

Review it as the poster.

在发布者窗口点击“查看申请”。确认申请者和说明，然后点击“接受”。

In the poster window, choose Review applications. Check the applicant and note, then choose Accept.

收到的申请 / Received applications

Community garden helper

applicant · applicant@example.test

I would like to help.

已提交 / Submitted

接受 / Accept暂不合适 / Decline

A · 接受之前 / Before the poster accepts

我的申请 / My applications

Community garden helper

I would like to help.

已接受 / Accepted

B · 申请者刷新之后 / After the applicant reloads

自己检查 / Check your work

申请者应看到“已接受”。当前参考需要刷新，不会自动推送变化。若仍是“已提交”，确认发布者操作是否成功。

The applicant should now see Accepted. This reference needs a reload; it does not push live updates. If the status is unchanged, check whether the poster's action succeeded.

结束招募，记录也不能丢。

Close applications. Keep the history.

发布者点击“结束招募”，申请者刷新。机会不再提供“申请”按钮，但“我的申请”中的已接受记录仍在。
As the poster, close applications. Reload as the applicant: the Apply button should disappear, while the accepted record remains in My applications.

B · 发布者改了时间，随后结束招募 / Poster changed the day, then closed applications

自己检查 / Check your work

重新开放后，“申请”按钮恢复。结束招募、拒绝申请、删除记录是三件不同的事。

Reopen the opportunity and check that Apply returns. Closing recruitment, declining an application and deleting a record are different actions.

轮到你设计 / Your turn to design

申请者改变主意了，能撤回吗？这项功能留给你在第 8 章设计和实现：谁能撤回、接受后能否撤回、原记录怎么保留。

What if an applicant changes their mind? Chapter 8 asks you to design and build withdrawal: who may withdraw, whether acceptance changes the rule, and what history remains.

这四页展示参考项目的操作结果。完成自己的版本后，还要检查权限、异常情况，并解释自己的实现。

These pages show the reference flow. Your own project also needs permission checks, failure cases and an explanation of your implementation.
